O'Hair Customs™

the very best in custom shutters.

precise architectural tailoring
expertly matched finishes
genuine american quality

O'Hair Customs™

Welcome to the very best in custom designed, precision-crafted, finely-finished shutters.

Transform your home with timeless beauty and practical style that transcends the useful life of any other window treatment. Enjoy the natural warmth and patina of real wood combined with functional control of light, view and privacy.

Precisely Tailored

For the look of master planning, O'Hair Customs™ feature frame profiles tailored to the architectural details of each home. For windows with existing wood casing, shutter frame profiles are minimized to preserve the beauty of existing trim (see right). For untrimmed windows, larger profiles are employed to provide the look of wood casing. Rather than appearing as an add-on, O'Hair Customs™ have the look of master planning.

the shutter frame complements the window casing

Expertly Matched

Precise color matching is indispensable to ensure that O'Hair Customs™ perfectly integrate into your home décor. Paints are custom matched to the requirements of each order using spectrophotometer instrumentation. Stains are blended by a certified colormaster and applied to our Grainselect™ surface, a computer-controlled selection of wood to ensure uniform grain and color. The results are natural finishes of unparalleled beauty.
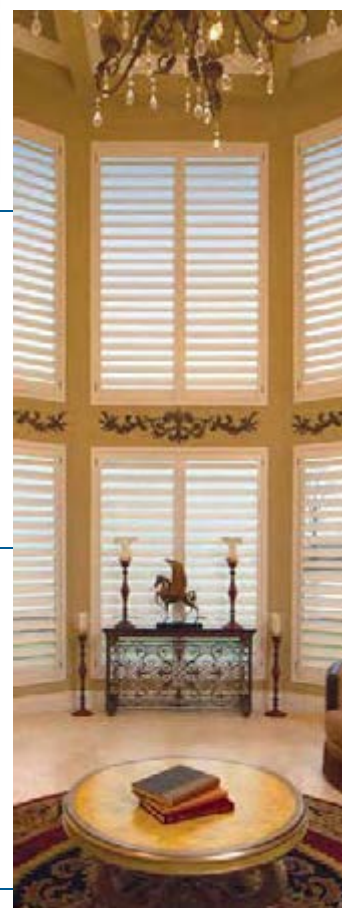

Superior Warranty

Some "lifetime" warranties are very short-lived. The Homeowners Transferable Limited Warranty™ from O'Hair is good **for the life of the home**, not just for the original owner. In addition, O'Hair Customs™ are warranted against minor damage by pets, children and other sources (*see warranty for details*). No other manufacturer provides a warranty as long lasting or as comprehensive.

Made in the USA

Constructed from genuine American hardwoods O'Hair Customs™ are built in America by American craftsmen. Our lumber is harvested on family-owned land, where landowners demand sustainable forestry and responsible conservation. Our time-honored methods of wood seasoning, edge-gluing, and precision joinery result in shutters built to last for the life of your home.
